Important note

Product information	The fixed DC repeater ACT20P-CI-VO isolates analogue standard current signals from a power source or from a 2- or 3-wire sensor. An analogue input current signal is converted linear and galvanic isolated into an analogue output voltage signal. The power supply is galvanically isolated from input and output (3-way isolation). Features • The active or passive mA current signal inputs are completely electrically isolated. • Front LED indicates operation status. • 3-way galvanic isolation between input, output and power supply
